

# Movement Joints in Tile and Stone Installation – presented in conjunction with the National Tile Contractors Association (NTCA)

**July 26, 2022 / 2 p.m. EDT**

Movement joints are an essential part of any tile installation. There are high risks of failure when movement joints are not installed. This Webinar addresses the basics of movement joints and their importance to tile installations.

During this presentation, participants will:

- Learn what the different types of joints are in a typical concrete slab and how to treat them.
- Learn about industry standards for movement joints.
- Learn how to incorporate movement joints into projects.

## WEBINAR

Movement Joints in Tile and Stone Installation – presented in conjunction with the National Tile Contractors Association (NTCA)

July 26 at 2 p.m. EDT

Duration: 60 min.\*

*\* The Webinar will include a question-and-answer period.*
