

Grouting Tips for Extreme Temperature and Humidity Conditions

April 29, 2021 / 1 p.m. EDT

Grouting Tips for Extreme Temperature and Humidity Conditions: This Webinar will provide helpful techniques and tips for tile installers who are grouting interiors with no HVAC. The Webinar will also provide tips for exterior grouting in extreme temperature and humidity conditions.

Participants will learn:

- The installation challenges that arise from extreme temperature grouting.
- The advantages and disadvantages of various grouts in temperature and humidity extremes.
- The challenges of grouting in exterior locations.
- Best practices when grouting in extreme temperatures and humidity.
