

# Underlayments for Marine Applications

August 12, 2021 / 1 p.m. EDT

This Webinar looks at flooring underlayments designed for marine applications.

Topics discussed will include:

- Why it is important to use an underlayment when installing flooring on board ships.
- How marine underlayments differ from “regular” flooring underlayments.
- How to choose the correct underlayment for each shipboard flooring application.

## WEBINAR

Underlayments for Marine Applications

August 12, at 1 p.m. EDT

Duration: 60 min.\*

\* The Webinar will include a question-and-answer period.

About the presenters

### Guido Sardi

Guido is the Business Development Manager for MAPEI's U.S. Marine Division and is responsible for Market Share and New Product Development. He joined MAPEI in 2016, bringing his 20 years of experience in the marine industry to help foster the growth of MAPEI's marine line of products. His experience in the marine industry includes international sales for various sectors, ranging from pumps for hulls and engines to resin floorings. Guido also has experience in consulting through his work with the Italian Research and Consultancy Center owned by Fincantieri, one of the world's foremost cruise ship builders.

### Mike Daniels

Mike is the Technical Service Manager for MAPEI's Marine Division. He has 28 years of experience at MAPEI Corporation and a total of 35 years of experience in the construction industry. This experience includes technical assistance and product training for the U.S., Caribbean, South American and marine markets, in addition to small- and large-scale physical/structural testing of building systems, the construction of building assemblies, product formulation and quality control. He is currently responsible for on-site product support, product recommendations and performing product training on the installation of underlayments, and flooring systems related to marine applications, as well as the evaluation of new products or systems in development. Mike is an active ASTM F06 and C21 committee member.
